

Spring Wheat Yield Clustering & Analysis

+ RM Level and yearly crop analysis on Spring
Wheat —
By Neha

Problem Statement & Data Collection

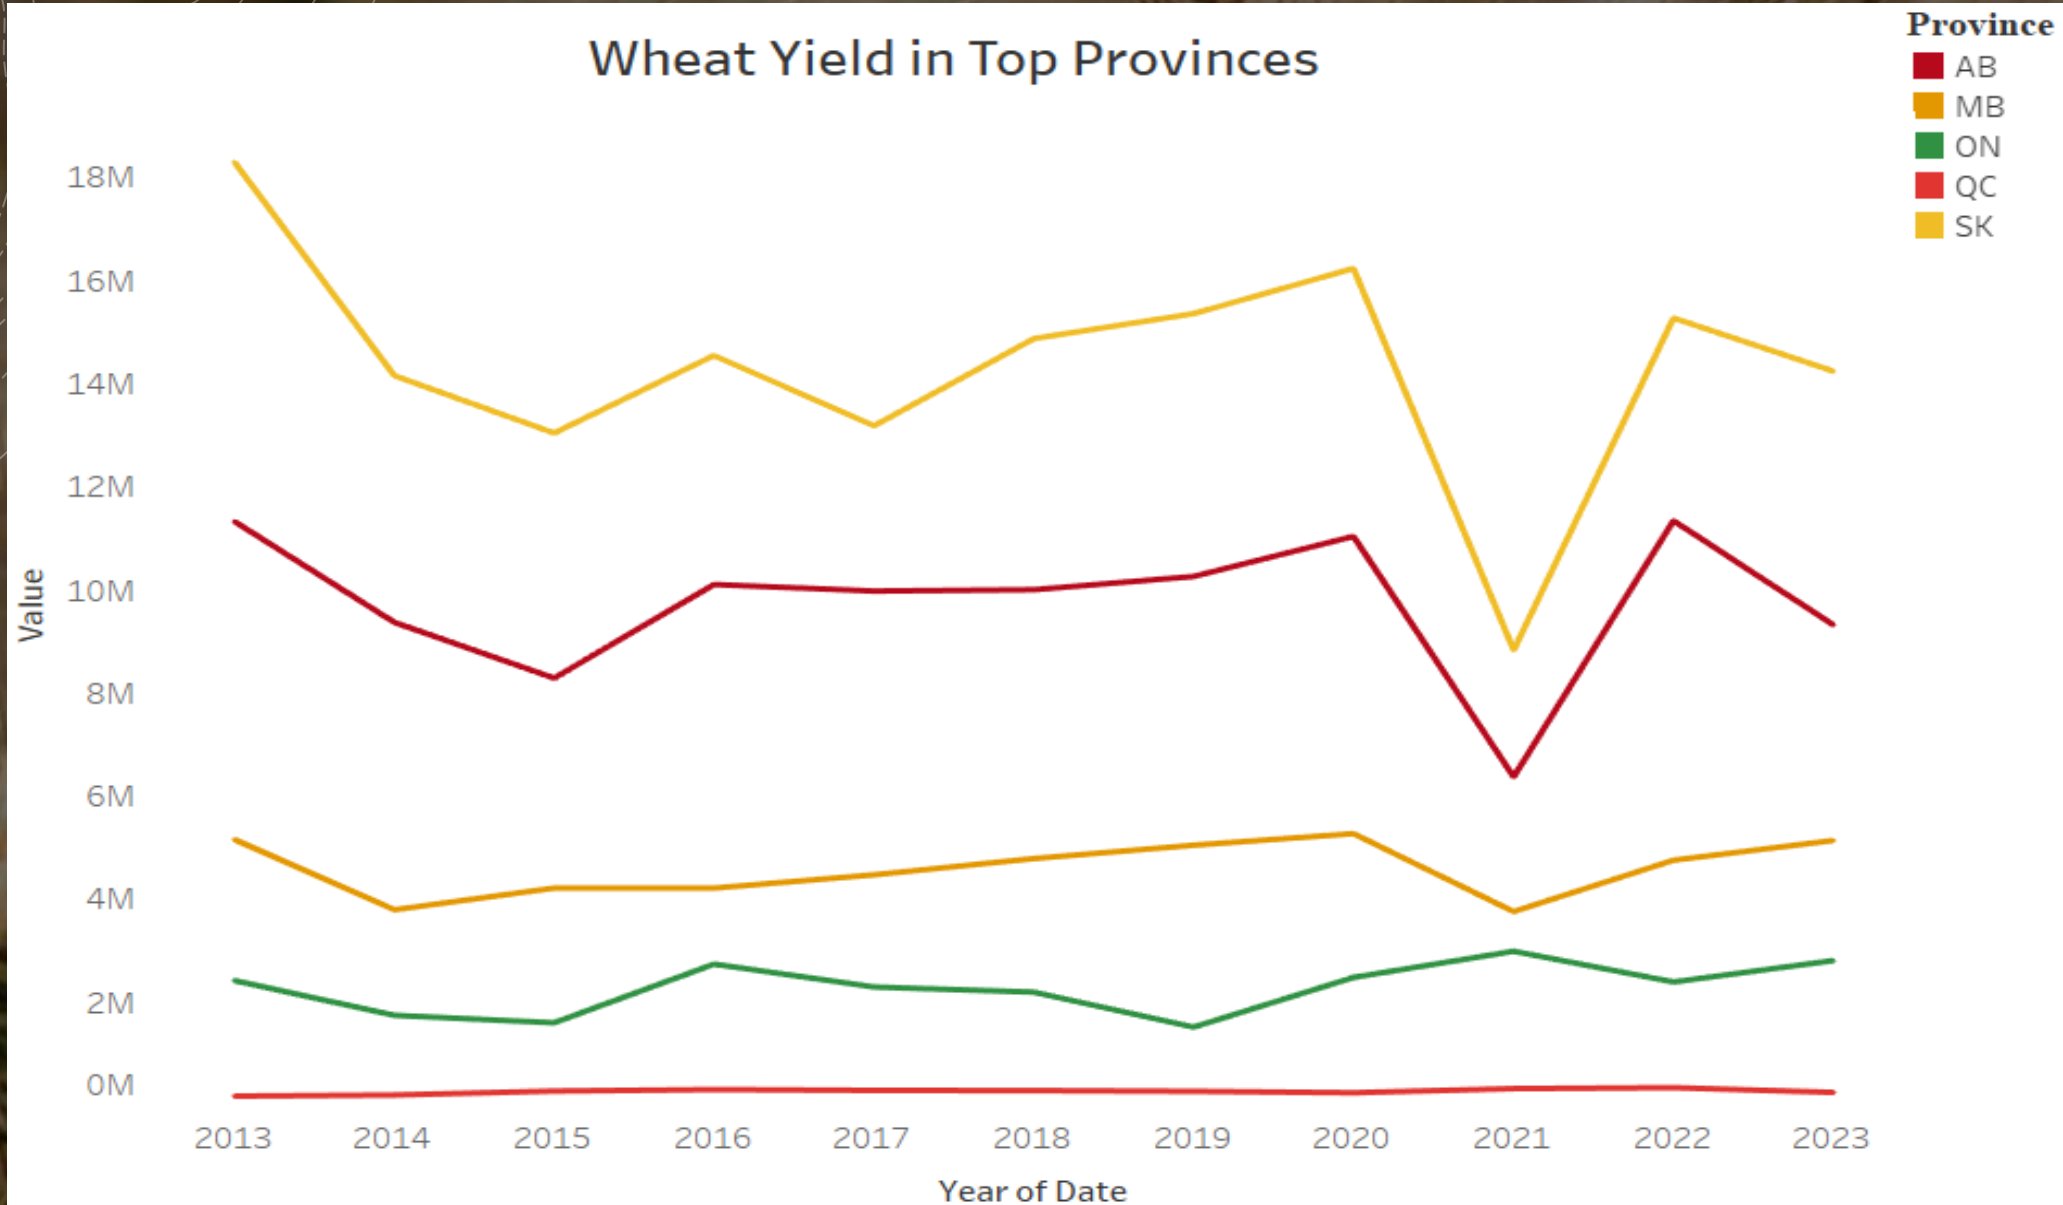

The demand of the wheat crop has been increased in past few years so this analysis will focus on the past yield and locations in Saskatchewan and will forecast the next 2 years yield

Yearly yield and Forecast Data

Conclusion

- + As per analysis, only few of the regions are growing the Wheat crop so other areas should also take that opportunity as it can lead to crop rotation also.
- + Spalding is one of the top city in wheat production in overall Saskatchewan.
- + Saskatchewan is still the top province in Spring Wheat crop yielding after the widespread drought decreased production in overall Canada by 38%.

Thank You
